

Brookside Elementary School

Projects Completed 2009 and 2010

- Repave and re-stripe the parking lot and drop off area
- Installation of programmable digital HVAC thermostats to allow for better control of heating and air conditioning systems and to maximize energy efficiency
- Installation of door locks to allow for secure classrooms during emergency lock down situations.
- Installation of hydration stations
- Testing and tune up of main electrical systems for optimal operation
- Replacement of all interior light bulbs to increase energy efficiency

Projects Completed Summer 2011

- ***Replace and upgrade entire fire alarm system for increase of student safety and mitigate building loss***
- ***Exterior plaster repairs and re-painting of exteriors at all campus buildings***
- ***Re-roof main classroom buildings***

Ongoing Project Planning

- Remove deteriorated doors, windows and frames, and replace with new doors, frames and energy efficient windows –
- Design studies to modernize the Multi Purpose room
- Traffic and design studies to modify student drop off area and increase staff parking
- Next steps of campus modernization

Oak Hills Elementary School

Projects Completed 2009 and 2010

- Replace built up roof with 20 year warranty, energy efficient reflective roofing
- Replace metal roofing
- Repaint exterior of all buildings
- Replace deteriorated window frames and non-tempered glass
- Installation of programmable digital HVAC thermostats to allow for better control of heating and air conditioning systems and to maximize energy efficiency
- Installation of door locks to allow for secure classrooms during emergency lock down situations.
- Installation of hydration stations
- Testing and tune up of main electrical systems for optimal operation
- Replacement of all interior light bulbs to increase energy efficiency

Projects Completed Summer 2011

- ***Replace and upgrade entire fire alarm system for increase of student safety and mitigate building loss***
- ***Modify site work and drainage at quad area to mitigate ongoing drainage issues. Relocate exterior drinking fountains to face of buildings. Restripe asphalt play areas.***

Ongoing Project Planning

- Next steps of District Master Plan

Red Oak Elementary School

Projects Completed 2009 and 2010

- Replace built up roof with 20 year warranty, energy efficient reflective roofing
- Repaint exterior of all buildings
- Replace deteriorated window frames and non-tempered glass
- Installation of programmable digital HVAC thermostats to allow for better control of heating and air conditioning systems and to maximize energy efficiency
- Installation of door locks to allow for secure classrooms during emergency lock down situations.
- Installation of hydration stations
- Testing and tune up of main electrical systems for optimal operation
- Replacement of all interior light bulbs to increase energy efficiency

Projects Completed Summer 2011

- ***Replace and upgrade entire fire alarm system for increase of student safety and mitigate building loss***
- ***Remove deteriorated doors and replace with new doors***

Ongoing Project Planning

- Next steps of District Master Plan

Medea Creek Middle School

Projects Completed 2009 and 2010

- Replace Gym built up roof with 20 year warranty, energy efficient reflective roofing
- Modernize Science classrooms
- Modernize Library and Computer lab
- Installation of programmable digital HVAC thermostats to allow for better control of heating and air conditioning systems and to maximize energy efficiency
- Installation of door locks to allow for secure classrooms during emergency lock down situations
- Install high efficiency air conditioning/heating system at the GYM
- Installation of hydration stations
- Testing and tune up of main electrical systems for optimal operation
- Replacement of all interior light bulbs to increase energy efficiency

Projects Completed Summer 2011

- ***Remove deteriorated skylight at the Library and replace with dual pane energy efficient skylight***
- ***Replace and upgrade entire fire alarm system for increase of student safety and mitigate building loss***
- ***Exterior plaster repairs and re-painting of exteriors at all campus buildings Remove deteriorated doors and replace with new doors***

Ongoing Project Planning

- Traffic and design studies to modify student drop off area and increase staff parking
- Next steps of District Master Plan

Oak Park High School

Projects Completed 2009 and 2010

- Repave and re-stripe the parking lot and drop off areas for increased parking capacity
- Replace deteriorated parking lot lights with energy efficient lights
- Remove deteriorated relocatable classroom buildings and replace with code compliant energy efficient relocatable classrooms.
- Installation of programmable digital HVAC thermostats to allow for better control of heating and air conditioning systems and to maximize energy efficiency
- Install high efficiency air conditioning/heating system at the GYM, locker rooms, weight and dance rooms and shower areas
- Replace Gym built up roof with 20 year warranty, energy efficient reflective roofing
- Refinish tennis courts
- Installation of door locks to allow for secure classrooms during emergency lock down situations
- Installation of hydration stations
- Testing and tune up of main electrical systems for optimal operation
- Replacement of all interior light bulbs to increase energy efficiency

Projects Completed Summer 2011

- **Replace and upgrade entire fire alarm system for increase of student safety and mitigate building loss – Complete Summer 2011**
- **Modernize and upgrade science classrooms at Building E**
- **Add science classroom at Building F**
- **Remove existing grass turf at the Stadium and replace with water conserving artificial turf in cooperation with and made possible by a donation from Oak Park High School Boosters Club (not funded by Measure “R”)**

Ongoing Project Planning

- Upgrade stadium facilities to comply with current accessibility requirements
- Next steps of District Master Plan

Oak View High School

Projects Completed 2009 and 2010;

- Repaint exterior of all buildings
- Repave and re-stripe the parking lot and drop off area
- Replace deteriorated parking lot lights with energy efficient lights
- Installation of programmable digital HVAC thermostats to allow for better control of heating and air conditioning systems and to maximize energy efficiency
- Installation of door locks to allow for secure classrooms during emergency lock down situations.
- Installation of hydration stations
- Testing and tune up of main electrical systems for optimal operation
- Replacement of all interior light bulbs to increase energy efficiency

Projects Completed Summer 2011

- **Replace and upgrade entire fire alarm system for increase of student safety and mitigate building loss**

Ongoing Project Planning

- Provide accessibility compliant toilet facilities for students and staff
- Next steps of District Master Plan

District Office

Projects Completed 2009 and 2010;

- Repaint exterior of all buildings
- Replace built up roof with 20 year warranty, energy efficient reflective roofing
- Repave and re-stripe staff and visitors parking areas
- Replace deteriorated parking lot lights with energy efficient lights
- Installation of programmable digital HVAC thermostats to allow for better control of heating and air conditioning systems and to maximize energy efficiency
- Installation of door locks to allow for secure classrooms during emergency lock down situations
- Testing and tune up of main electrical systems for optimal operation
- Replacement of all interior light bulbs to increase energy efficiency

Projects Completed Summer 2011

- **Replace and upgrade entire fire alarm system for increase of student safety and mitigate building loss**

Ongoing Project Planning

- Next steps of District Master Plan
