

Cannot get your desired grade on tests/quizzes, and don't know why?

Use the following questions to determine your preparation for a test/quiz:

- 1) Have you kept all your papers and worksheets for this chapter in your binder?
- 2) Have you taken notes in the class and completed the examples in your notes?
- 3) Have you completed all of the classwork assignments diligently in the class instead of copying from your group mates?
- 4) Are all your homework problems completed and corrected?
- 5) Have you made up all absent notes, homework, classwork, etc. before the test/quiz?
- 6) Have you studied your notes and practiced the examples in your notes on your own?
- 7) Have you studied your textbook and practiced examples in your textbook on your own?
- 8) Have you studied your homework assignment and practiced the problems that are marked or redone in red in the homework section?
- 9) Have you studied and practiced the classwork worksheets given for the chapter?
- 10) Have you studied and practiced the chapter quiz for the test?
- 11) Have you attended the chapter test review session for the test?
- 12) **Have you attended support period at least once a week to do homework/ask questions/study with a friend?**

If your answer is NO to at least three of the above questions, then you probably know why you cannot earn your desired grade on the tests/quizzes.
